

## FRONTISPIECE

*The single-deck suburban cars worked hard right to the very end. On the last day of regular eight-car single-deck suburban operations, Walsh Island Dockyard power car C3191 leads set H2 into Milsons Point on Friday 10 January 1992. The skyline of the North Sydney CBD forms a backdrop. This was the same day that four eight-car H sets were briefly assembled on the Sydney Harbour Bridge as a tribute to their sterling service. **Stephen Halgren***
